

# Stem Cell Culture and Banking Facility by Greater Pharma

**SCL** (Stem cell for life Co.,Ltd.) is a leading stem cell biotechnology company in Thailand, supported by Greater Pharma Group, one of the biggest pharmaceutical companies in Thailand.

We are proud to be the only Thai company that provides major source of stem cell banking services – including Hematopoietic stem cells from cord blood, autologous peripheral blood and Mesenchymal Stem cells from placenta, bone marrow and adipose tissue.

## Why choose us?

To ensure safety, our banking system follows standard as recommended by International Organization, AABB, ISBT128 and FACT. We also provide stem cell collection and culture services using the clean room class 100 laboratory which complies to Drug GMP standards and GLP (Good laboratory practices) standards to guarantee the cleanliness and safeties of our service.

## Research and development

Our research and development is based on adult stem cell technology. These R&D have the potential to be used for autologous patient specific for blood diseases, bone & joint, tissue, skin and stem cell growth factor for use in stem cell culture.

We are pleased to be a part of Thailand Science Park (TSP) the national research centers of Thailand. TSP has given us a lot of opportunities to become one of the successful biotechnology companies.
