

Twenty-seven years ago, we embarked on a remarkable adventure through a passage of events. Today, as we celebrate our 27th anniversary, our reflection overflow with gratitude for the incredible journey we have shared with our customers. Thousands of experiences while we have passed many obstacles, conquered challenges, reveled in the joyous moments, and congratulated in tremendous of their achievements. The countless memories of our customers' unwavering trust and support toward Bio-Active are our corner stone for our business concept **"We are your helping hands"**

Our team are passionate about delivering exceptional service by staying ahead from the norm and industry trends. We take pride in our dedicated team of value-driven professionals who actively listening to voice of customers (VOC) to gain insight into their requirements by truly understanding their ultimate goals and aspirations and provide the precision solutions and support that align with their vision since **"We are your helping hands"**

We mastered our framework that ensure a high-powered team who are ready to collaborate and be a strategic partner with our customers by sourcing and providing various of excellent technologies from our elite partners and alliances throughout the world for the existing and new emerging landscapes: "One Health" the convergence of foods, animal, environment and human health arena, Pharmacogenomics (PGx), Wellness Genomics, Microbiome Sequencing, Next Generation Sequencing (NGS), Multi-Omics, Gene Editing such as CRISPR-Cas9, Cell and Gene Therapy (CGT), Immunotherapy, Liquid Biopsy, Nanomedicine, Organ-on-a-chip, Cell Imaging, Digital therapeutics and more.

We believe in the power of **"We are your helping hands"** could create the positive impact and move your project forward and toward your destination as set. Together, we can reach new heights!

For this auspicious opportunity, we are excited and proud to present the following short presentation as constantly practice. Please feel free to contact our service solution channels and touch points for more specific information or search our corporate website at www.bio-active.co.th

High quality Monoclonal Antibodies, Polyclonal Antibody and ELISA KIT for the biomedical research

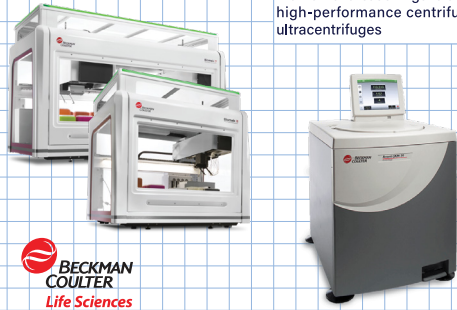

Primary Antibodies , Direct Conjugated Primary Antibodies, siRNA/ shRNA/CRISP, Research Chemical

Automated Liquid Handling Solutions

As experts in fluidtransferology Flexible, scalable liquid handling solutions for NGS, genomic, cellular, protein and other workflows

Centrifuges

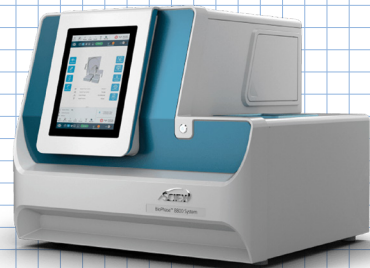

From a world leader in general-purpose, high-performance centrifuges and ultracentrifuges

BECKMAN
Coulter
Life Sciences

Capillary electrophoresis

Optimize your efficiency with SCIEX capillary electrophoresis systems with added sensitivity for unique workflows.

Mass spectrometers

An innovative portfolio of LC-MS/MS technology for quantitative and qualitative analysis across a wide range of applications

SCIEX
The Power of Precision

NovaSeq™ X series

Flow cell (Single reads)	1.5B*	10B	25B*
2x150bp output	0.5 Tb	3 Tb	8 Tb
	100, 200, 300 cycles	100, 200, 300 cycles	300 cycles

NovaSeq X* Single flow cell processing Up to 8T
*Available H2 2023

Upgradeable

NovaSeq X Plus Dual flow cell processing Up to 16T
Available now

Product Highlight

- Maximum throughput and accuracy (Max output : 16 Tb)
- More than > 20,000 Whole Genomes per year
- Ambient Shipment
- New onboard DRAGEN version

Illumina Complete Long Read Prep, Human

NovaSeq™ X/X Plus

NovaSeq™ 6000

Product Highlight

- Long and short reads from the same instrument
- Highly accurate, reliable results
- Low DNA input requirements

For more information
